

I totally support XM Satellite Radio. I pay for the services and I want my voice to be heard. XM Sat Radio provides not only music, but it provides weather, news, sports and traffic news as any other radio channel would. I have traveled in my husbands truck and understand why XM Sat radio is his next best friend. Before, a truck driver had to change radio stations every 100 miles give or take to know what was going on and sometimes he wasn't able to receive any channels. Now with XM he and many other drivers can listen to non-interrupted music, weather, news, etc. Don't take that away from these drivers...it's their lifeline out their on the highway as truckdrivers are our lifeline to the many commodities they deliver to our doors. We pay for these services, so let our voices be heard; please reject the NAB's petition 04-160 and support XM Satellite Radio and it's services to the people.
